## Aufgabe 2)

```
menu = load_menu()
repeat
    print('a - Speisekarte anzeigen')
    ...
    option = input()
    if option == 'a':
        for k, v in menu:
            print(k, '=', v)

    elif option == 'n':
        name = input('Name des Gerichts')
        price = input('Preis des Gerichts')
        menu[name] = price

until option == 'e'
save_new(menu)
```
